

EXPANDED METAL FAÇADE MESH/ SUNSCREEN MESH in Aluminium and GI

Protecting from fierce Sun, Wind or Rain, Expanded Metal Façade Mesh offers endless scope in Internal & External applications with its variety of colors, sizes & materials.

The structure of Expanded Metal Façade Mesh aids the disruption of sound waves, deadening noise and reduction of echo. These practical features of the material in conjunction with its already proven architectural features make it perfect for both decorative ceiling tiles and acoustic panels and are chosen by designers and architects for their beauty and striking appearance.

It also gives an attractive, decorative and acoustic look as the mesh acts as cladding to the exterior walls but it also serves as a sun screen over the windows and create striking visual effects and appearances.

Expanded Metal Façade Mesh can be supplied in mild steel, galvanized steel, stainless steel, aluminum, copper, brass sheets as per specific requirements and in wide range of openings and thickness. It can be powder coated and painted in various colors.
