

New Age Metal Facade

- Citadel has tied up with 2 international companies operating in the field of new age metal facades
- In collaboration with these companies Citadel is bringing these designs to the Indian market
- A few of the projects executed by the 2 collaborators in overseas markets are shown in the presentation
- We would be pleased to customize your ideas with the international team and designs and execute the same.
- New age facades created by our international partners using aluminium and steel materials. Complicated and highly engineered material can be customized and created. Perforation, bending, coating, riveting and all such expertise can be aligned to attain the architect's vision.
