Glass and Polycarbonate Retractable Roofs from CITADEL

The Pioneer in Openable Roofing in India

Enjoy your terrace, backyard, balcony, and swimming pool all year round. Enjoy the fresh air with your roof fully opened on warm days, and relax in the evening for dinner under the stars.

Citadel Retractable Roofs are completely **waterproof** and **windproof**, offering good insulation against the elements. They are strong and durable due to excellence in design of profiles.

A key advantage of our systems is the amount of clear opening – when fully retracted, at least **75%** of your space will be uncovered.
