

CITA BRICKS

The everlasting Facade Brick

Transform your facade into a classic brick look that will require no maintenance or cleaning, year after year.

Citadel Building System Pvt Ltd is glad to launch modern, light, long lasting facade bricks by the name of Cita Bricks.

WHY CHOOSE CITA BRICKS

- Choose Cita Bricks for a Facade that remains Fresh as New!
- Traditional Bricks become black and Shabby
- Cita Brick Stays Fresh as ever !
- Traditional Bricks are heavy and add to the weight in transportation and in installation
- Cita Bricks are light, easy to transport, easy to install
- Traditional Bricks are only red in colour
- Cita Bricks come in endless colour range
- Traditional Bricks can be used in small bungalows only because of the weight
- Cita Bricks can be used on high rise building too !
- Cita Bricks come in varied colours and textures.

What is Cita Brick ?

Cita Brick are light weight concrete facade bricks designed as a superior quality facade product. Cita Bricks are tested for fading, water absorption and fire resistance. The product comes with 15 years of warranty.

How is Cita Brick Fixed ?

Cita Bricks can be fixed to plastered walls using chemical adhesives and grout. Any additional sealer is not required as a top coat.

Are the sizes of all bricks uniform ?

Citabricks will have a variation of +- 2mm in the dimensions and thickness. This variation lends a natural look to the bricks.

Will a Cita Bricks Facade become black after rains ?

A building which is cladded with Cita Bricks will remain fresh as new, year after year.

Is Cita Brick Fire Resistant ?

Yes
