- The weight is about 100KG/sqm.
- Adults and children can walk on the cover (safety protection function, no tables and chairs).

SLIDING DECK POOL COVER

A sliding deck pool cover is a sophisticated and innovative solution designed to cover and uncover a swimming pool by means of a sliding mechanism. Unlike traditional pool covers, which may be manual or automated but typically rest above the water's surface, sliding deck pool covers are integrated into the pool's design and structure.

HOW SLIDING DECK POOL COVER WORKS ?

1

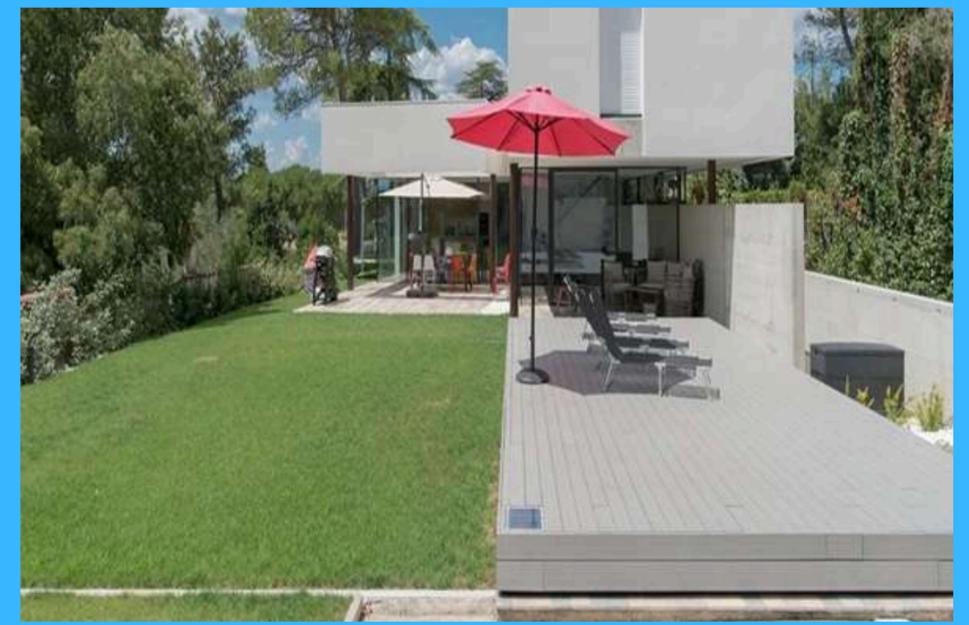

Sliding deck pool covers are seamlessly integrated into the pool area, often as part of the pool deck or surrounding structure. The cover is designed to move horizontally, and when closed, it becomes an extension of the deck, creating a solid and secure surface.

2

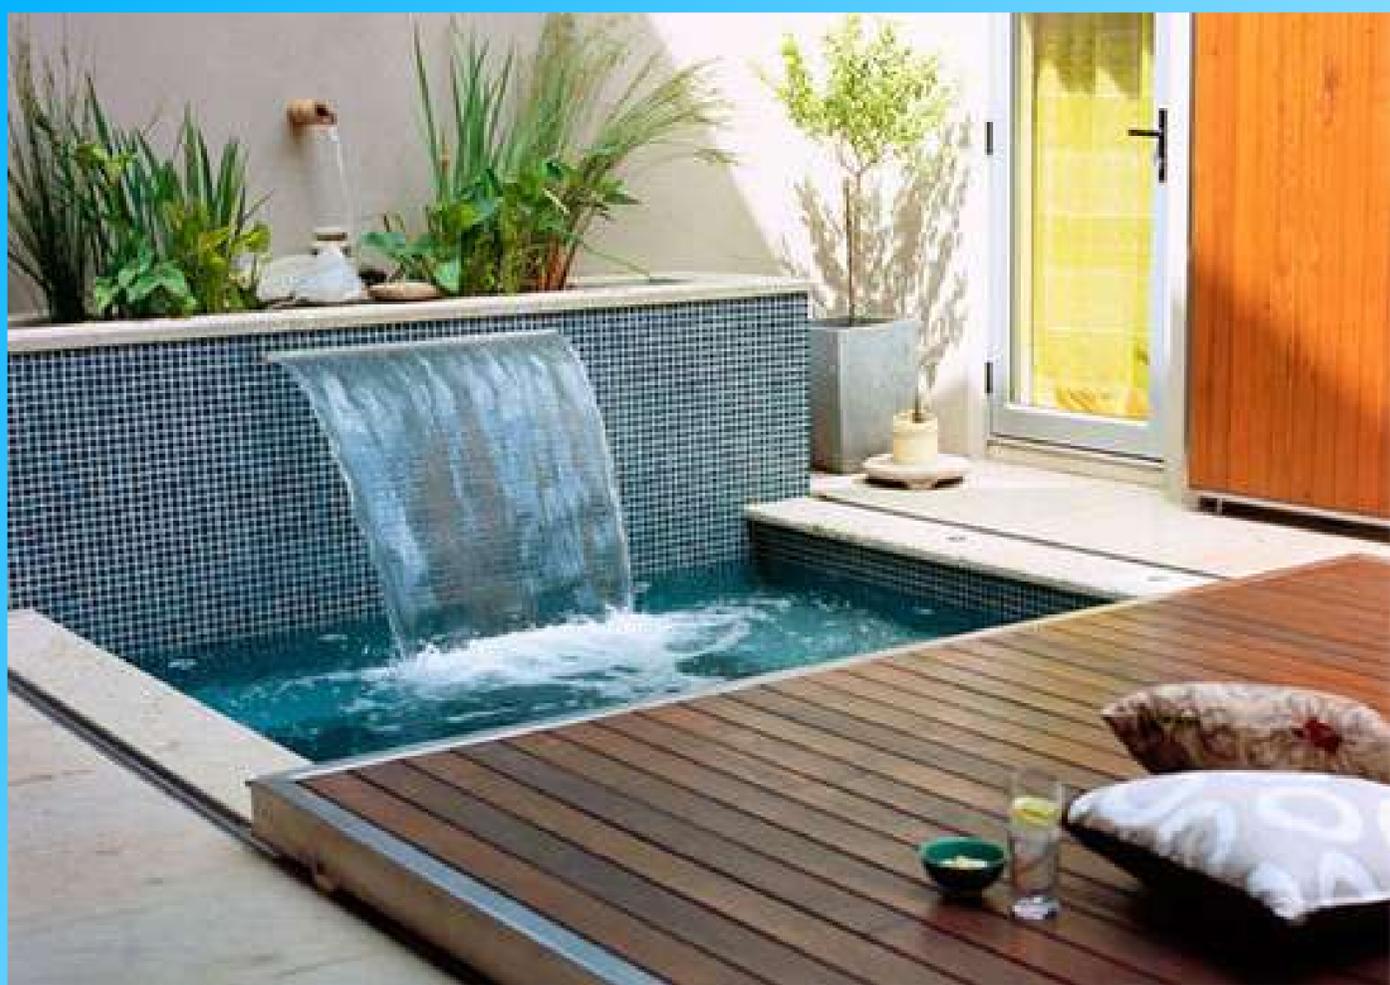

The cover operates on a horizontal sliding mechanism, allowing it to move smoothly to cover or uncover the pool. This can be achieved manually or through an automated system, providing pool owners with a convenient and efficient way to manage the pool's access and protection.

3

When closed, the sliding deck pool cover acts as a protective barrier, enhancing safety by preventing unauthorized access to the pool. Simultaneously, it transforms the pool area into additional usable space, offering versatility and functionality beyond its primary role as a pool cover.

What Makes It Good?

One key advantage of owning a sliding pool deck cover is the extra space that you get back.

Create More Space.

They Can Save Energy.

Most Effective.

Nice Look

Safe.

Sliding deck pool covers also help to prevent evaporation and keep heat from escaping.

Citadel pool covers contribute to environmental responsibility by conserving water and energy, aligning with our dedication to creating products that make a positive impact.

BIFOLD POOL COVER

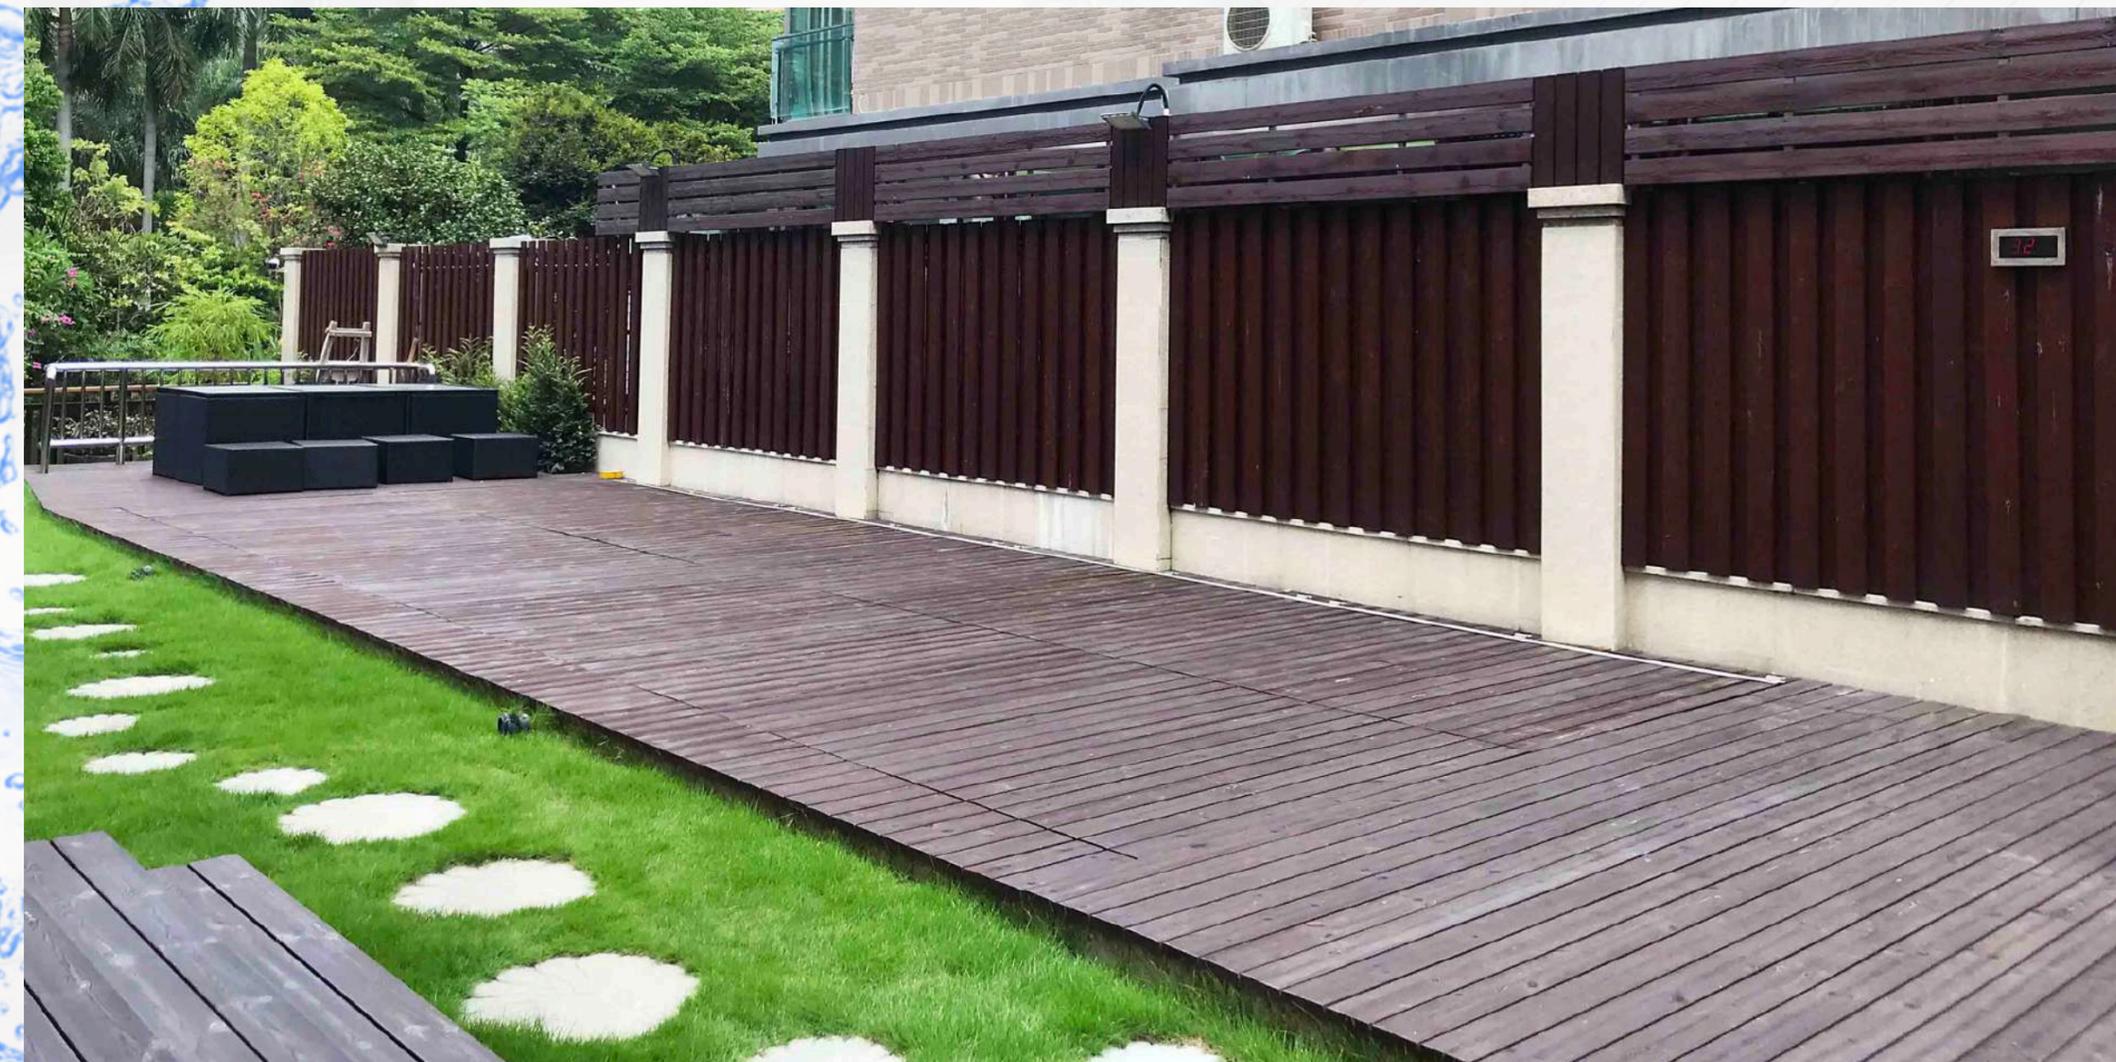

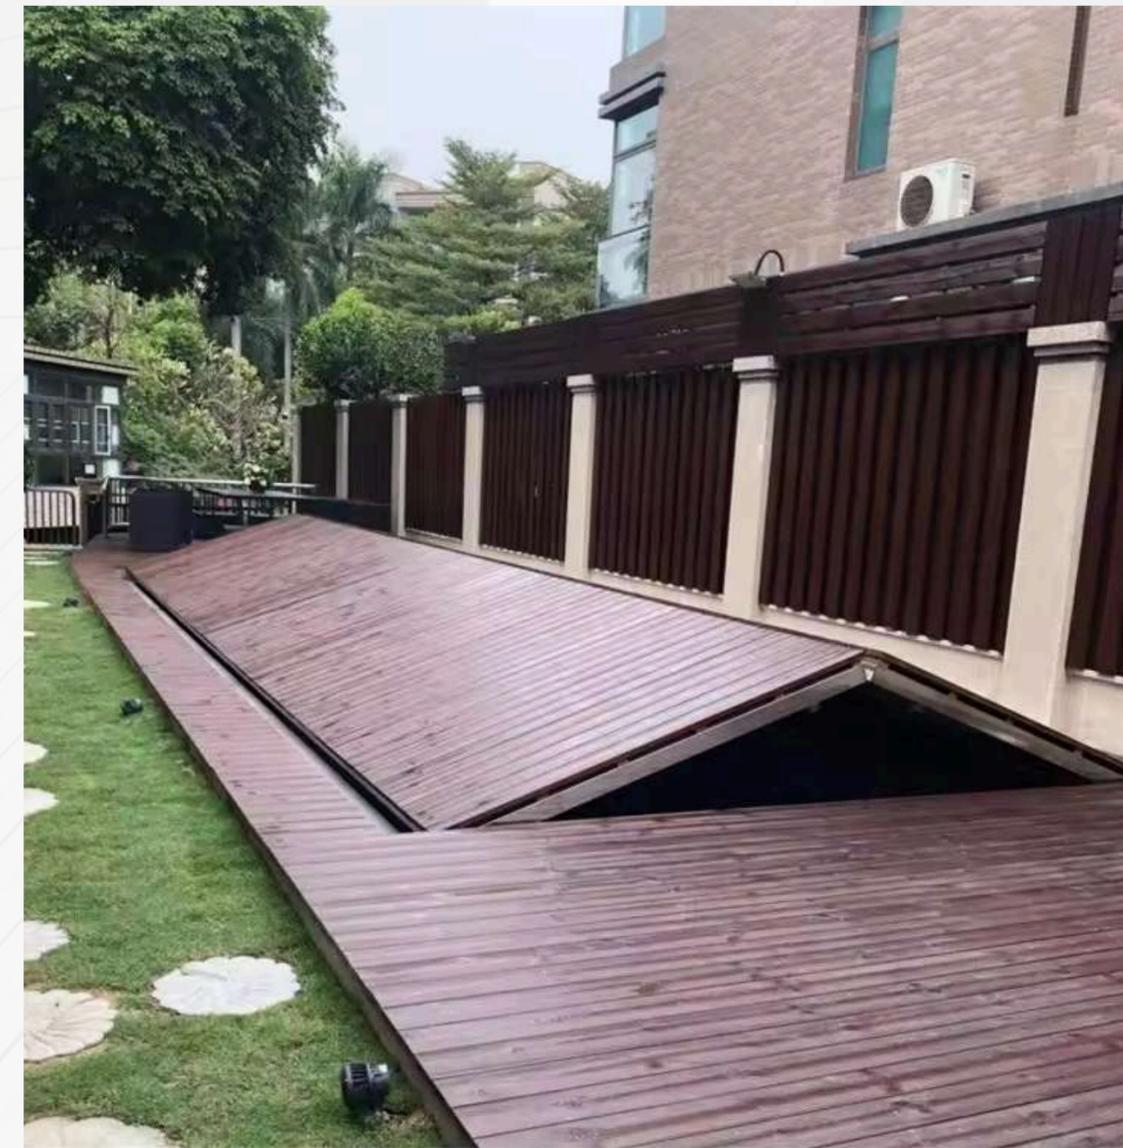

The Bifold Pool Cover is an innovative solution designed to protect and enhance your pool area. Combining functionality with aesthetics, this cover offers seamless operation, a modern design, and durability that withstands diverse weather conditions. It is perfect for maintaining cleanliness, safety, and usability of your pool area year-round.

DETAILS OF BIFOLD POOL COVER

- Constructed with high-grade **aluminum or steel frames** for stability.
- Panels made of toughened glass or polycarbonate for durability.
- Customizable size to fit pools of all shapes and dimensions.
- Manual or motorized folding system for effortless operation.
- Powder-coated, anodized, or natural finish options for aesthetic appeal.
- Engineered to support light foot traffic for maintenance purposes.
- Reduces pool maintenance costs by keeping debris out.
- Minimizes water evaporation, enhancing energy efficiency.
- Ensures safety for children and pets.
- Increases usability during unfavorable weather conditions.
- Protects the pool from UV damage and harsh weather conditions.
- Provides privacy and adds aesthetic value to the pool area.
- Extends the lifespan of the pool and its accessories.

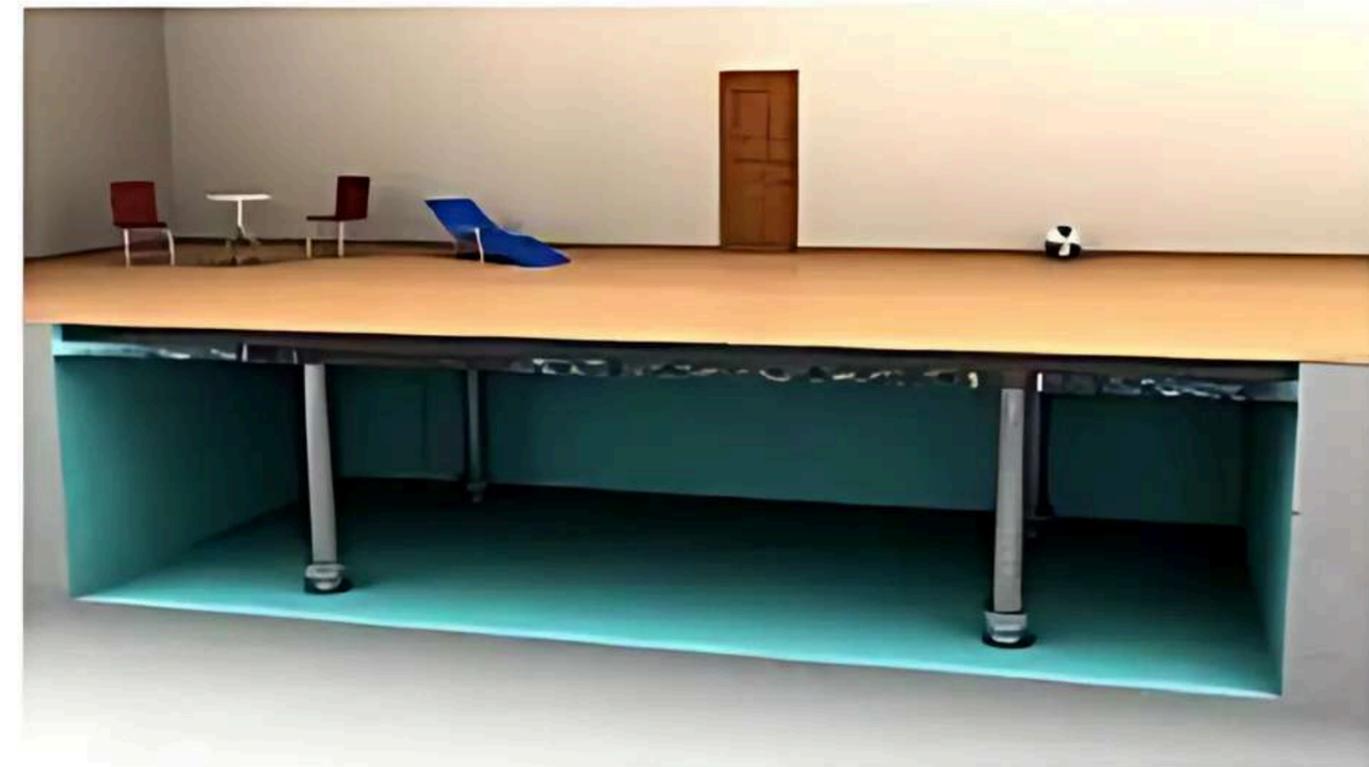

RISING UP POOL COVER

A Rising Pool Cover is a revolutionary solution that transforms your pool area into a versatile, multifunctional space. Using advanced **hydraulic** or **motorized systems**, the pool cover can be raised or lowered effortlessly, allowing you to switch between a fully functional pool and a solid deck surface.

This innovative design is perfect for optimizing space, enhancing safety, and maintaining the cleanliness of your pool. The Rising Pool Cover is ideal for residential and commercial applications, offering a seamless blend of technology, aesthetics, and practicality.

DETAILS OF RISING UP POOL COVER

- The safest movable pool floor system on the market, with an **8mm gap** between the pool floor and walls to eliminate the risk of entrapment.
- Versatile depth control allows adjustment to various levels:
 - **20 cm** for children's safety.
 - **Mid-depth** for exercises or leisure.
 - **Full-depth** for swimming.
- Operates entirely on **hydraulics**, removing the need for **electric motors** and ensuring reliability with low maintenance.
- **Hydraulic pillars** provide stronger, simpler, and more efficient installation compared to **pulley-based systems**.
- Compatible with any covering material, such as **mosaic, porcelain stoneware, or natural stone**, for seamless integration with the surrounding design.
- Constructed from high-quality **stainless steel**, offering corrosion resistance, durability, and a **no-weld design** for enhanced longevity.
- **Customizable** to any pool size or shape, suitable for diverse applications.
- Works with all water treatments, including saltwater, chlorine, and advanced **Pure Pool Technology**, ensuring superior water quality.
- Retains heat, keeping the water warm and in optimal condition for extended periods.
- Combines safety, versatility, and aesthetic appeal, making it a perfect choice for residential and commercial pools.
